

Self-Service for coffee lovers

The WMF 1800 S user guide was developed specially for the requirements of self-service operation. The keys arranged in a line above the coffee spout, a special cup stop and the design of the drip tray help the customer to select the desired product and place the cup in position.

Attractive auxiliary units like milk coolers, cup racks and mug dispensers, vending units like coin checkers, coin changers, banknote or card readers and mobile coffee stations are available for use with the machines. These upgrade the WMF 1800 S to a fully equipped vending unit which can even be mobile if required.

Features

WMF 1800 S

Self-Service for coffee lovers

Versions

Individuality is the key

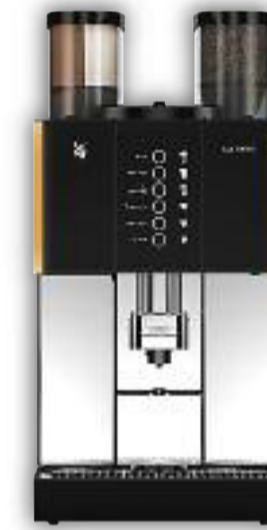

Its proven modular design ensures the WMF 1800 S will fit in perfectly at the place of use. The machine can be equipped with one or two grinders and with a chocolate, topping, twin chocolate or twin topping hopper, as desired. Extra security for self-service use: all hoppers have a lockable lid.

Version with 1 grinder (left-hand one is inactive) or 2 grinders, illumination. 8 keys allocated.

Version with 1 grinder, choc, no illumination. 4 keys allocated.

Version with 1 grinder, twin choc, illumination. 6 keys allocated.

Version with 1 grinder, topping, illumination. 4 keys allocated.

Version with 2 grinders, choc, illumination. 8 keys allocated.

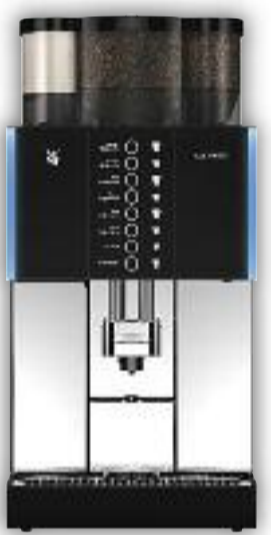

Version with 1 grinder, twin topping, illumination. 8 keys allocated.

Version with 2 grinders, twin topping, illumination. 8 keys allocated.

Version with 2 grinders, twin choc, illumination. 8 keys allocated.

Version with 2 grinders, topping, illumination. 8 keys allocated.

Examples of use

From the coffee break at the office or at conferences and meetings, in service areas, self-service restaurants, public buildings, car showrooms or in coffee-to-go outlets. Wherever staff, customers or visitors help themselves, the WMF 1800 S provides total coffee pleasure.

It combines optimum ease of operation with top product quality and lots of product variety – from Espresso and Café Crème to Cappuccino, Latte Macchiato and Caffè Latte and even fine hot chocolate. And the obligatory jug of coffee for the conference room can be dispensed quickly and easily at the touch of a button by an authorised person.

WMF 1800 S

Easy to operate
The attractive line-up, a one-cup spout and a central cup stop make it easy to select a product and place the cup in position.

Great design
The attractive illumination, which is freely selectable in all the colours, also flashes to show if the coffee beans or milk need to be topped up.

One spout does it all
All the coffee specialities, chocolate and hot water come from a single spout, i.e., the cup is always in the same place.

Delicious hot chocolate and chociatto
Almost any creation involving chocolate and coffee can be produced with lots of hot fresh milk

Hot water at the correct temperature
The WMF 1800 S, for tea for example, simply at the touch of a button.

Easily adjustable spout height
Containers up to 180 mm tall can be filled. A jug of coffee can also be filled, for meetings for example, by inputting a PIN.

The clear labelling concept
allows the button labels to be individually designed with product names, prices or pictures and swapped around as required.

Variable number of product buttons
Up to 8 buttons are available for allocation to coffee specialities as desired. The number can be reduced at any time and increased again later, according to circumstances.

Auxiliary units and vending units
Cup racks, milk cooler or mug dispenser, combined with vending units like a coin checker, coin changer, banknote or card reader, complete the self-service operation facilities.

Maintenance is so easy
You can do the basic maintenance yourself. That means fewer visits by the WMF service engineer.

Large coffee grounds container
The easy-access, centrally located coffee grounds container has a large capacity.

Optional twin spout
The WMF 1800 S is also available with a twin spout if required.

Works with vending units
If a vending unit such as a coin checker is connected, the display shows helpful messages like "Please insert correct coins", etc.

Quality management
Various quality settings with predefined brewing parameters are available to make it easy to set up the products.

The WMF 1800 S is intelligent
If you alter the quantity of ground coffee, all the other settings will be adjusted automatically. For consistently good coffee

Self-explanatory display
The display shows all the steps and useful information and it is also used to alter the machine settings.

Automatic cleaning
at the touch of a button. That saves time and cuts operating costs.

Plug-Clean
The patented, optionally available Plug-clean milk cleaning system effortlessly cleans all parts in contact with milk

Permanent descaling
A WMF water filter extends maintenance intervals, enhances taste and prolongs the service life of the machine.

Environmentally friendly with «Green WMF»
Lower energy consumption, less use of chemicals and almost total recycling are just a few features of the sustainable WMF concept.

Our own service fleet
In Germany more than 270 engineers ensure that you can always rely on your WMF 1800 S.

Manual insert
On machines with 2 product containers, it is possible to use a second type of ground coffee. Machines with 3 containers have only one cleaning chamber.

Slim build
A WMF 1800 S is only a little bit wider than the long side of an A4 page. So there's room for two, even on the smallest counter.

Well thought-out product containers
The containers can be closed before removal to make cleaning and refilling very much easier.

WMF 1800 S

Self-Service for coffee lovers
